

John Summers

I have worked in one of the world's deepest gold mines at 3km below the surface, and in the world's largest open pit copper mine that is visible from space!

My favourite food is my wife's steak and kidney pie...

...though not too often!!

I have worked in the mining industry all my life, have travelled extensively in my various roles and lived in Africa for some while.

In 1969, (long before the gap year was invented!), I spent 9 months, prior to going to university, volunteering with the Ethiopian Ministry of Mines.
