

Art and Design

We will make detailed observational drawings of flowers using a magnifying glass to look closely at shapes and patterns. We will use pipe cleaners to create leaves and flower shapes. We will press flowers and laminate them to create a bookmark.

Geography

We will be observing plants that grow in the local area and find out about plants in a contrasting location such as the Brazilian rainforest.

Science

We will plant our own 'pizza garden' including ingredients such as tomatoes and basil. We will also plant sweet peas and sunflowers and watch them grow over the term. We will explore our five senses and use our sense of smell to explore different herbs and other pleasant and unpleasant smells. We will observe how food scraps such as carrot tops and potatoes grow. We will dissect a flower, look at the different parts, and make a coloured flower using food colouring. We will make our own mini rainforests in a jam jar.

Year 2 Summer Term The Scented Garden

Wow Day- Visit to a florist
Visit to Frankie & Benny's

Design & Technology

We will play, explore and experiment in a mud kitchen. We will make our own scented play dough by mixing in ingredients such as lavender. We will design our own 'fairy gardens using objects we find outdoors.

R.E

We will be learning about the special relationship between Jewish people and God and the promises they make to each other.

Music

We will be making up our own songs about planting seeds and how flowers grow by changing the words to songs we know.
